Nestlé Health Science Statement on Demand for Infant Formula for Cow's Milk and Multiple Food Allergies

A recent recall of infant formula products has caused challenges for many parents. Our thoughts go out to families affected by the incidents and recall. We know that it is distressing for parents when they cannot find their current formula.

We understand that this situation will have a wide-ranging impact and we are working hard to help parents and their children during this difficult time.

We are collaborating with healthcare professionals and institutions to provide access to our infant formula for cow's milk and multiple food allergies, Alfamino Infant, Alfamino Junior Unflavored, Alfamino Junior Vanilla. Our teams are doing everything possible to increase production of these products to help meet this increased and unexpected demand.

For information related to Nestlé Health Science products, including the Alfamino products, or quality and nutrition information regarding our products, please call 1-800-422-2752, Monday through Friday, 8:00 a.m. to 8:00 p.m. ET.

Any decisions made around feeding your child should be made in consultation with your healthcare professional.
